The following is an examiner's statement of reasons for allowance: The prior art does not teach to detect the electric charge on an electrode located in the proximity of an object irradiated by an electron beam in an inspection apparatus and to generate a voltage to the electrode corresponding to this charge to offset the charge.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The two patents to McCord et al. both teach to measure the electric charge on the object to be inspected, not on an electrode located in the proximity of the object.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on Monday-Thursday (8:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
